What is the Health Care Management program?

P.I.T.'s Health Care Management is an innovative approach to provide students with fundamental skills in management, business, health care information, anatomy and physiology, health care law and ethics, medical billing and coding, and insurance and reimbursement—all essential functions required to be a successful health care manager.

Why is the program beneficial to me?

The Health Care Management program at P.I.T. prepares students for entry-level jobs in the management of health care organizations. Graduates find careers in:

- Hospitals and health systems
- Urgent and emergency care centers
- Insurance industry
- Managed care facilities
- Medical group practices
- Outpatient centers
- Home health care agencies
- Physicians' offices
- Long-term care facilities

Where can I go after P.I.T.?

In addition to being prepared for immediate employment, P.I.T. has transfer agreements with a number of colleges and universities in the area. These agreements enable you to transfer the college credits that you earned at P.I.T. and complete a bachelor's degree at any accredited college or university. P.I.T. will prepare you for the next step that's right for YOU!

PROGRAM TOTAL: 65

*Prerequisite coursework is required.
NOTE: Additional course(s) may be required based on the results of a placement test.

Course Highlights

BIO 135-Anatomy and Physiology I

This course presents the structure and function of the human body using a systematic approach. It introduces the proper general terminology used to describe the relative position of body parts, body sections, and body regions. Laboratory instruction and activities include the study of human anatomy via computer software and quantitative studies of physiological processes.

HCM 219-Health Care Law and Ethics

This course addresses the legal, policy, and ethical issues encountered by health care professionals. In an evolving health care environment, health care professionals encounter issues surrounding HIPPA compliance, state/federal government regulations, patient consent, refusal of treatment, privacy/confidentiality, fraud, and abuse.

HCM 117-Introduction to Health Care Informatics

This course provides students with an introduction to the role of data and data management in the delivery of patient care in the health care industry. The thrust of the course will be on information technology in health care, including issues related to organization, management, data integration, selection of software.
